## 2025 – 2026 Advisory Group Workplan

Below is the Board approved workplan for the 2025 - 2026 Advisory Group program year. The approved plan will guide the Operations Committee as they plan the Advisory Group meetings

ASSP standing committees are expected to carry out their responsibilities as defined in their standard operating procedures and/or committee roles and responsibilities. Committees should not take on work outside of their defined scope without prior direction or approval from the Board. In addition to fulfilling their outlined scope, the following committees have been assigned additional workplan items:

- **Advisory Group Operations Committee:** Per the Board's request and following the recommendations of the Governance Task Force, an evaluation of the AG will be conducted to assess effectiveness and member engagement
  - A review of [SOG 4.1](#) by the Operations Committee will be an outcome of the above evaluation. Recommendations for changes will be made to the Board of Directors by June 2026.

This workplan aligns with the member community domain in the ASSP strategic plan, specifically aligning governance to support inclusive and engaging opportunities for members to meet evolving needs of ASSP.

Working together for a safer, stronger future.® | [assp.org](https://assp.org)
